TESTNET - TEST KEYS - NOT REAL CUSTODIANS

Radox Custody Rail: dual-signed custody, on Stellar

github.com/
pwsaragossy/rio-miami-rail

First corridor: Rio–Miami. HackMeridian 2026, Scale track. Testnet build, test keys.

Hack Meridian / 2026 LISBON | GUAVA® Stellar

© 2026 HackMeridian · Lisbon

PITCH STEP 01 / 04

Every handover, signed by both hands

custody_registry: outgoing and incoming custodian sign the same transaction.

The token stays with its holder in transit.

After Delivered, the operator burns it.

Handover 1 on stellar.expert (testnet), hash 635c99ac…0bd38

Outgoing signs — **One transaction** — **Incoming signs**

PITCH STEP 02 / 04

Who holds the cargo right now?

A shipment changes hands several times: warehouse, port, carrier, customs.

Handovers are mostly paper or sit in one operator’s system.

Our hypothesis: a financier cannot easily see who holds it.

Context only: global trade finance gap US$2.5T (ADB Global Trade Finance Gap Survey, Dec 2025). Sizes the financing gap; not evidence of the custody pain.

PITCH STEP 03 / 04

How it runs on Stellar

open	handover 1	handover 2	handover 3	handover 4	deliver	burn
2b3d51f0	635c99ac	56a0f006	ac268a49	5199d4fb	919def8c	864fd164

7
successful testnet transactions

9
invalid cases refused

24
contract tests pass

MATCH
verify-head recomputes the chain

custody_registry (testnet) CCBJVXMJ…H4LII head 2d74fec0…5414

Testnet - test keys - not real custodians

PRIOR WORK

Prior work versus this weekend

EXISTED

Radox platform

3 Soroban contracts on mainnet

transfer_agent

BUILT HERE

custody_registry

test harness

verify-head

shipment page

Code written by AI coding agents.

Per-file record of tool and reader: AI_USAGE.md

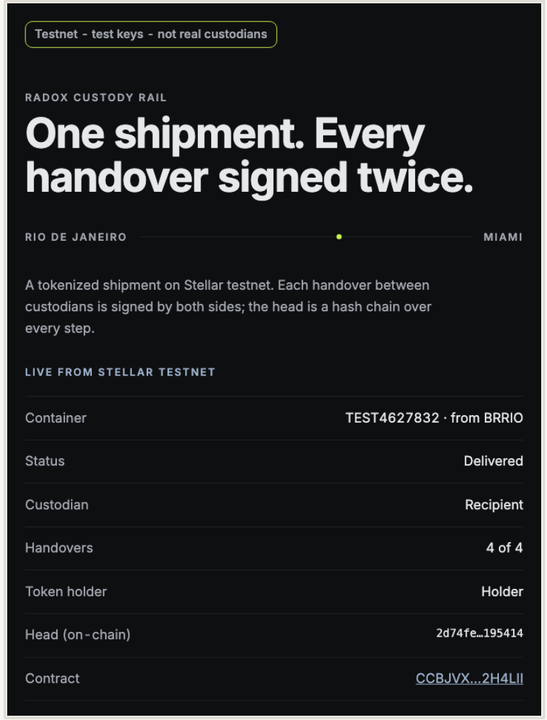

© 2026 HackMeridian · Lisbon · #HackMeridian26

USERS

Who uses it, and why

Exporter, custodians (warehouse, port, carrier, customs), **buyer**, **financier**.

Value: a financier can see where the goods are, and who signed for them, before paying.

No users yet.

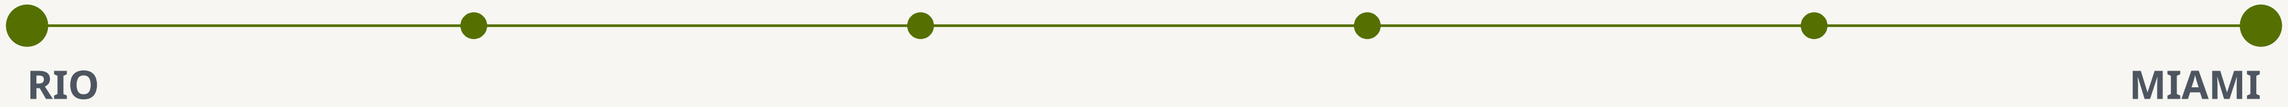

Public shipment page: rio-miami-rail.vercel.app

© 2026 HackMeridian · Lisbon · #HackMeridian26

BUSINESS

The rail is ours; the format is public

MODEL	SWIFT model: public record format; Radox runs the rail and API.
REVENUE	Fee from the institution operating it; not priced yet.
NEXT	One pilot shipment with one producer; none agreed.

Context: a Rio–Miami trade-corridor initiative. No agreement, endorsement or pilot.

© 2026 HackMeridian · Lisbon · #HackMeridian26

MARKET + NEXT

From one corridor to a standard

NEXT

Full testnet matrix, then mainnet; an audit is not done.

PLANNED

An SCF Build application (not yet submitted).

FUTURE

A USD on-ramp leg; not built.

Mentor question: which ramp delivers USD to a C-address (SEP-45 draft)?
